Experience

TD Bank *(Hybrid)* | New York City, NY   November 2022 – Current
Software *Engineer*
- Worked on functionality to enhance applications used by various channels.
- Transformed business requirements and research into winning delivery solutions that met performance goals.
- Aimed for defect-free programming, created and maintained quality code, provided support during testing cycles and post-production deployment, as well as engaged in peer code reviews.
- Developed and maintained processes that addressed and resolved identified issues, while communicating/alerting stakeholders as needed.
- Completed unit and integration testing per standards and design specs.

TechStack: Java, Cloud-Based Services, CI/CD Tools, Springboot, Jira, Jenkins, Git

Playbook Sports *(Remote)* | Hoboken, NJ   June 2021 – December 2021
Front-End Developer
- Built 25+ responsive websites deploying frontend technology with various themes based on mockups.
- Established the website's architecture according to the client's requirements.
- Ensured high performance, added additional features, as well as troubleshooted content issues.
- Assisted in developing an intuitive user interface for the company website using tech stack.

TechStack: JavaScript, Node.js, Web Components, HTML, CSS, Bootstrap, WordPress
